1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Johnson on 3/24/2011.

The application has been amended as follows:

Claim 9, Line 2, delete "an" before "an elastomeric material and replace with --a first—

Claim 9, Line 8, delete "an" before "an elastomeric material" and replace with --a second—

Claim 9, Line 13, between "and" and "elastomeric material" add --second—

Claim 10, Line 3, between "the" and "elastomeric material" add --first—

Claim 11, Line 2, between "said" and "elastomeric material" add --second—

Claim 21, Line 1, between "said" and "elastomeric" add --second—

Claim 22, Line 1, between "said" and "elastomeric" add --second—

2. The following is an examiner's statement of reasons for allowance:

It is first noted that during the prosecution of the instant application that in determining the scope of "directly adhering the resistant layer to the fabric.." that based

Art Unit: 3657

on the definition recited in the specification, this requires adhesion between the fabric and the resistant layer without the use of an additional adhesive. Upon further consideration of the references in view of the recent amendment to the claims, while Ito discloses the use of a resistance layer adhered directly to the fabric without the use of adhesive and while Mecco additionally teaches the use of a resistance layer with fluorinated plastomer, Mecco also teaches the use of an adhesive layer between the resistance layer and the fabric. It has been determined that the specific structure of the resistance layer allows for the adhesion of the resistance layer to the fabric without the use of an adhesive layer, therefore the combination of Ito teaching a resistance layer adhered to a fabric without an adhesive and Mecco teaching a resistance layer would not render obvious the claimed invention as without the specific requirements of the resistance layer the resistance layer would not be able to adhere to the fabric. This is further evidenced by Gibson et al. (2006/0174997 A1) newly cited, which discloses the use of a resistance layer 20, disposed on a fabric layer 22. Gibson discloses an optional use of an adhesive however the resistance layer does not include an elastomeric material and in the absence of adhesive relies on an impregnation of the resistance layer into at least a portion of the fabric layer, which does not occur in the instant application due to the composition of the resistance layer and the application of RFL solution to the fabric. Gibson additionally discloses that the adhesive is preferred as fluorinated polymers exhibit virtually no adhesion to most substrates. For these reason the examiner feels that the invention as claimed is non-obvious over the prior art..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANNA MOMPER whose telephone number is (571)270-5788. The examiner can normally be reached on M-F 6:00-3:30 (First Friday Off).
